

# Descartes for UPS® Digital Connections

## Solutions “Purpose Built” for Different UPS Customer Types, Sizes & Requirements

### About the Solution

- With over 10,000 joint customers, Descartes is the first UPS Digital Connections Certified solution provider with deep domain expertise in ecommerce warehouse and shipping. Descartes offers the broadest range of options designed for UPS customers including simple front office rating, high-volume shipping, process automation, and integration with nearly all ERPs, CRMs, and ecommerce platforms.

### Descartes OzLink™ for UPS Free

#### Front-office UPS Automation

- Designed specifically to improve operations for the front office
- This introductory solution provides access to key information to help quote shipping costs accurately and confirm delivery timeframes

### Descartes OzLink™ for UPS Plus

#### Gain Added Visibility and Control

- The easiest way to rate UPS services, check delivery times, and validate addresses to ensure packages arrive exactly where and when they're needed
- Expands on the Descartes OzLink for UPS Free edition to provide:
  - Side-by-side published and negotiated rates
  - Rating for multi-piece shipments
  - Street-level address validation
  - Full proof of delivery
  - Microsoft Excel-based bulk processing

### Descartes OzLink™ for UPS QVRT

#### Current and Accurate Shipping Rates and Strategic Archiving

- Descartes OzLink™ Quantum View Rating & Tracking (QVRT) is strategically designed to work in conjunction with the standard UPS QVD technology
- Automated visibility to third-party drop shipments, costs displayed before receiving UPS bills, tracking status, and proof of delivery
- The solution operates hands-free and automatically, and can be applied to third-party, outbound or inbound shipments
