

# OzLINK<sup>®</sup> Custom

## Integrate Magento and UPS WorldShip<sup>®</sup>

OzLINK Custom for UPS can seamlessly integrate your Magento eCommerce site with UPS WorldShip to streamline your end to end fulfillment process. The proven implementation standards of OzLINK Custom help create a solution that is easily supported, easily upgraded, and installed in half the time needed by most other custom solutions.

### SEAMLESS INTEGRATION WITH UPS WORLDSHIP

- Pull order information real time from Magento
- Update Magento with status and tracking number
- Leverage all UPS services such as UPS SurePost, Mail Innovations, UPS LTL Freight and International Paperless Invoice
- No more re-typing or copy and paste in your warehouse

### LEVERAGE BUSINESS RULES

- Select UPS service and options automatically
- Automatically select insurance based on value
- Select UPS Surepost based on weight
- Incorporate Magento custom fields to automate business rules

### AVAILABLE ADVANCED OPTIONS

- Print combination pack slips and UPS labels
- Batch Processing
- Integration with QuickBooks or other ERP systems
- Generate branded email notifications or packing slips
- Leverage bar code scanning

### WHAT DOES OZLINK DO BEYOND NATIVE MAGENTO

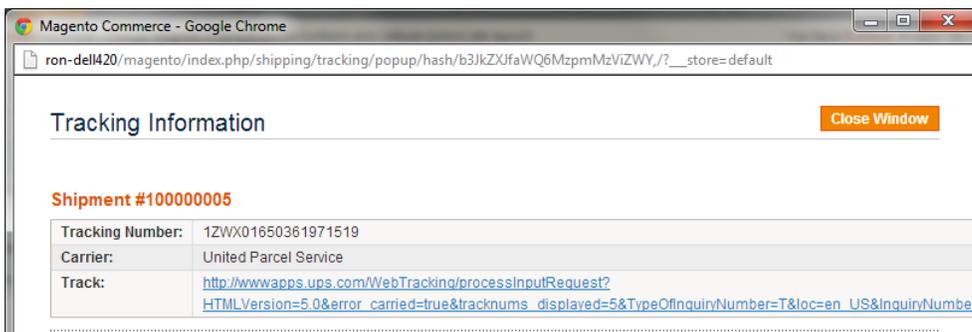

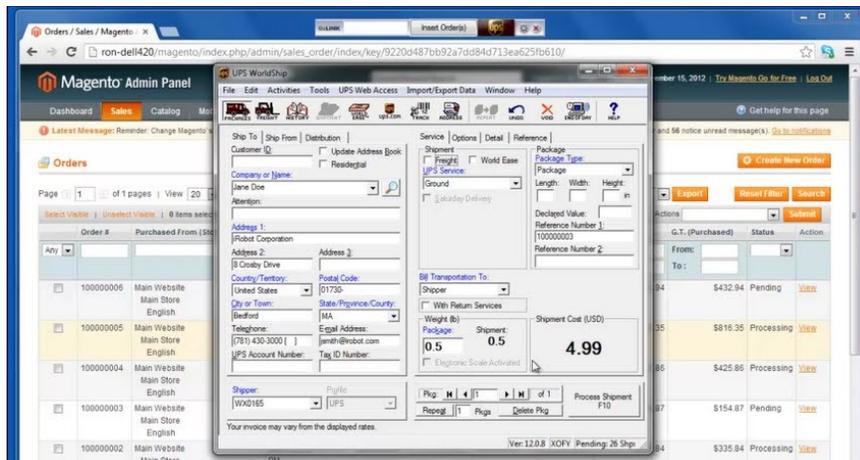

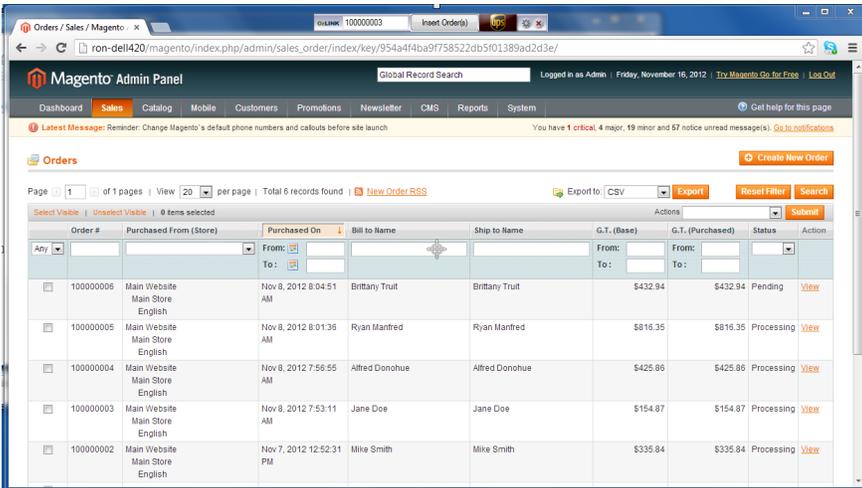

- Leverage all UPS services including UPS SurePost
- Branded pack slips and combination pack slip with UPS label
- Use of peripherals such as a scale and bar code scanner
- Automation of business rules

Oz Development integrates UPS shipping with Magento as well as many accounting systems such as QuickBooks, Sage 50 (PeachTree), NetSuite, Microsoft Dynamics, MAS 90/200, and many others. No matter how unique your business process might be, we've seen something similar. Please contact us for a free solution consultation.

### What is connected eCommerce?

eCommerce is growing faster than any other sales channels, and is fast becoming one of the most critical growth areas for manufacturers, distributors as well as pure Internet Retailers. However, as eCommerce penetrates further into traditional business models, it is fundamental that it gets tightly integrated into the order management process. The risks of not doing so are disappointed customers and partners.

Connected eCommerce ensures that from the moment a customer places an order there is clear visibility to the order both internally and externally. When a customer demands it, internal operations needs to embrace it to support profitable growth. Integrating eCommerce into fulfillment operations involves:

- (1) real time integration of your Magento site into the order management process
- (2) automated business rules to manage the order workflow
- (3) real time status updates including costs and tracking information back into both Magento and the accounting system
